

# Odin Petroleum AS

## Odin Petroleum AS – A leading petroleum advisory group

- Established in 1997 by founders and staff with substantial experience from Norwegian Petroleum Industry. In a short time Odin Petroleum was able to make a name as a successful and attractive service company in a competitive marketplace.
- Long lasting partnership established with services to serious oil companies and service companies.
- More than 50 regular staff members are available for single-placement or in-house projects in multi-disciplinary teams. Our hallmarks are high competence personnel and stability in organization.

## Three main divisions

- Geology and Geophysics including seismic processing and AVO/Rock Physics
- Reservoir and Production Engineering
- Well site and Operation Geology

## Modern and secure office environment

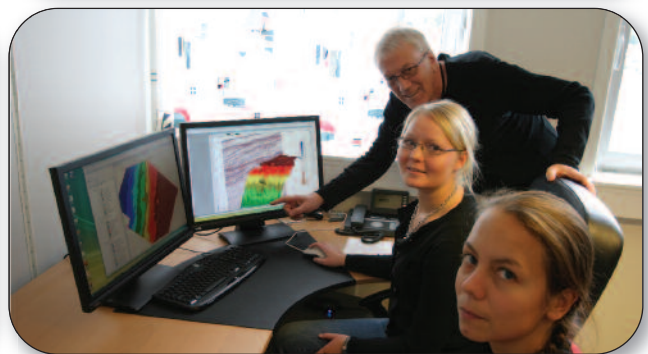

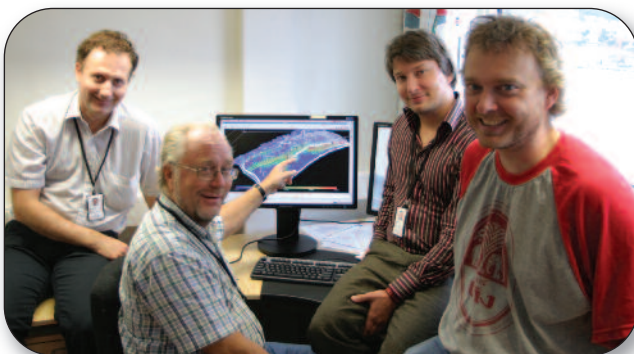

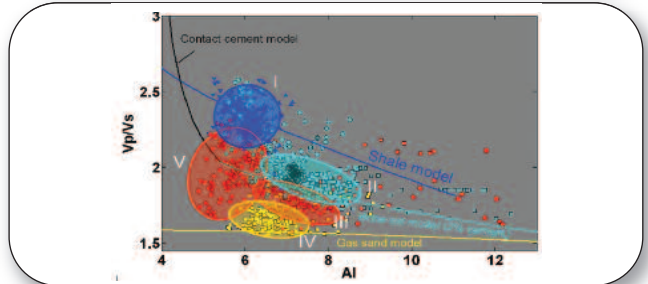

- Location in Straume Technology Center (Bergen, Western Norway) in a cluster of O&G service companies.
- Latest computer facilities and software tools for the industry.
- Comprehensive training program for junior staff and update of seniors.

## Strategy to grow in Norway and Internationally

- Increasing client base with Norwegian companies focused in Bergen, Stavanger and Oslo.
- Partnership with other service companies to gain competitive advantage.
- Focus on core competences in line with industry needs.

## Vision – The Norwegian Petroleum Advisors

- Odin to become the leading Norwegian E&P service company with respect to G&G and reservoir services.
- To deliver top quality services to our clients, covering the entire value chain from exploration to tail end production.
- Odin to export state of the art Know-How to the International Market.
